

RoseWater Energy HUBs: The Most Complete Residential Power and Energy Management Solution Available.

PROTECT WHAT MATTERS MOST

The RoseWater Energy HUBs are designed to provide superior performance and exceptional efficiency for homes and can eliminate intrusive service calls related to damaged or non-responsive devices and connected components. Because of this, RoseWater Energy HUBs also help protect your privacy, time, and lifestyle.

Our award-winning and state-of-the-art energy management systems are engineered to provide the potential for whole-home power conditioning, consistent energy supply, robust surge, sag, brownout, and blackout protection, all in one unit. Want to add solar integration? We can do that, too.

This highly differentiated combination ensures your lighting, network, entertainment, automation, control and security systems, appliances, plumbing, and health and life safety systems are not only protected but capable of performing at their best, no matter the circumstances.

Simply put, RoseWater Energy's complete solutions ensure peace of mind for home and property owners.

ROSEWATER HUB20
20 kW/100 Amp Continuous Power Output

RoseWater Energy HUB

Our flagship energy management solution, the RoseWater Energy HUB, is engineered to ensure uninterrupted power 24/7/365.

RoseWater HUBs filter and regulate all incoming power. Our intelligent, touchless management system eliminates the need for a transfer switch and requires little, if any manual input. High-capacity storage that provides zero transfer time and ample standby power.

Our solutions are a highly beneficial proactive measure that keep your home running smoothly during power outages and peak demand times.

- **Industrial-Grade Surge Protection:** Safeguards against damaging power spikes, sags, and surges.
- **Always Engaged:** Instantaneous power during outages and anomalies.
- **Voltage Regulation:** Stable power supply for devices, components, and appliances.
- **Noise Filtration:** Reduces electrical noise for better performance.
- **Scalable Solutions:** Tailored capacities to meet your needs.

RoseWater Energy is committed to delivering category-leading, highly reliable, and sustainable energy management solutions.

ROSEWATER HUB40
40 kW/200 Amp Continuous Power Output

Here's why you should choose RoseWater Energy:

- **White Glove Delivery & Commissioning:** Expert delivery, installation & support from start to finish.
- **Reliability:** Durable products, exceptional performance, excellent warranty.
- **Innovation:** Leading-edge technology and continuous improvement.
- **Expertise:** Our team has decades of experience in the category.

PROTECT WHAT MATTERS MOST.
YOUR TIME,
PRIVACY, AND
TECHNOLOGY
INVESTMENT.

What's Your Power Plan?

Power is the Foundation™ upon which every home's technology infrastructure should be built. Unfortunately, power is often overlooked and assumed to be "good enough." At RoseWater Energy, we believe in proactive vs. reactive protection for the things that matter most.

Our Power Plan was designed to help identify your home's true power needs, based on how you live and what's most important to protect.

This takes the guesswork out of the decision making process and ensures you'll never be left in the dark.

 Think of it as a bullseye with Level 3 in the center.

LEVELS OF PROTECTION

LEVEL 1
No protection
Minor inconvenience if lost during a power event or outage.

LEVEL 2
Generator
Motor-driven equipment like HVAC, walk-in freezers, pool equipment, and elevators.

LEVEL 3
RoseWater HUB
Critical microprocessor-driven infrastructure like networks, lighting, security, and entertainment, control & automation systems that are both costly and time-consuming to repair or replace.
